Cut and bend, made to your drawings

Six simple steps from your plans to steel on site, all handled by one team in our own Auckland workshop.

STEP 1
Send your drawings
Email or upload your plans, engineer's drawings or bar schedules (PDF, DWG, DXF, JPG, PNG or ZIP). Or give us a call to get started.

STEP 2
Detail sheet
Our in-house detailer turns your drawings into a reinforcing detail sheet: every bar mark, size, quantity, cutting length and shape.

STEP 3
Estimate
Our in-house estimator takes off the quantities and prices the job. We reply to price requests within one working day.

STEP 4
Agreement
Check the detail sheet and the price. If anything needs to change, tell us and we update both before anything is cut.

STEP 5
Confirmation
Once you confirm, your order is cut and bent in our East Tāmaki workshop. We're flexible on turnaround: urgent orders can often be turned around fast.

STEP 6
Delivery
Delivered to your site across Auckland and the North Island, or ready to collect from our yard.

09 274 4999 · millier@millierreinforcing.co.nz

51a Allens Road, East Tāmaki, Auckland 2016 · Monday to Friday 7:30am to 5:00pm; Saturdays by appointment · millierreinforcing.co.nz

DRAFT - NOT FOR DISTRIBUTION

Detail sheet first...

Before anything is made, you get a reinforcing detail sheet: a complete, scheduled breakdown of every component you will receive, ready to check against your drawings.

EXAMPLE

millierreinforcingltd

Reinforcing Detail Sheet

CUSTOMER ABC Builders Ltd	CONTACT NAME AND PHONE Sam, 021 000 0000	ORDER NO. PO 1234
